

Finit-Easy original®

FinitEasy®

No angle is safe anymore!

The FinitEasy® is the tool par excellence for every staircase, boiler and tank manufacturer, for any construction firm. In short, this is for everyone who works with stainless steel, aluminium or special alloys and who aims for a high level of quality.

Innovative concept

Does your angle-grinder have a limited reach?

Do hard-to-reach places require acrobatic positions or are they simply inaccessible?

Can you not get the most out of your grinding discs?

Do you want a perfect finish to internal angles?

Do you want a professional finish for every angle?

Introducing the FinitEasy®, a true revelation in the abrasive world. From now on, you no longer have an excuse to leave angles unfinished.

With the flexible, three-dimensional finishing wheels attached to the FinitEasy®, you can:

- finish all hard-to-reach spots and angles without any problem.
- finish weld seams evenly.
- work on stainless steel, aluminium and special alloy structures in the most hard-to-reach spots.

Thanks to the long, stable arm you can easily get to the most inaccessible corners.

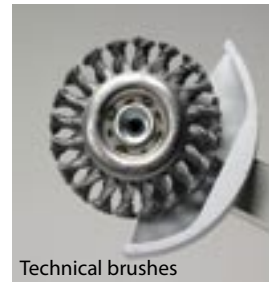

The flexible, three-dimensional SA discs adapt easily to any internal angle.

Finally, hard-to-reach places can be given a perfect finish thanks to the SA-FinitEasy combination.

**Also suitable in
combination with:**

Technical brushes

Rapid Combi Disc

Flap discs

Cutting and grinding discs
